EDUCATION

PES University, RR Campus — Bengaluru, KA

Nov 2024 – Present

Bachelor of Engineering in Computer Science and Engineering
CGPA: 8.79 — Sophomore

PROJECTS

PESU I/O – ML Model Optimization | Python, TensorFlow

Oct 2024 – Nov 2024

- Worked on a PESU I/O research project; team received the Distinction Award
- Implemented and optimized models based on the N-BEATS research paper for time-series forecasting
- Improved model accuracy and response speed by re-implementing architectures from research papers
- Extracted and deployed a novel model architecture into the team pipeline

ShelfLife – Full Stack Web Application | HTML, JavaScript, PHP, MongoDB

Nov 2025 – Dec 2025

- A full-stack web application to track product inventory and expiry, helping users manage and reduce waste efficiently
- Implemented secure backend integration with user authentication, account creation, and session management
- Developed a full-stack web application with frontend and backend integration
- Designed and connected a database system for data storage and retrieval
- Built and tested backend functionality for seamless client-server communication

Quroute – Quantum Satellite Placement | Quantum Computing, Qiskit

2026 – Present

- Developing a quantum-based solution for satellite entry and optimal orbital placement
- Combining quantum algorithms with classical logic for complex optimization problems

HACKATHONS & COMPETITIONS

Terrathon Hackathon – AI Dermatologist Assistant

- Built an ML-based system to classify skin diseases (including skin cancer) from images
- Integrated a Gemini API chatbot with prompt engineering for precise symptom analysis and remedies

Cryovault CTF Hackathon – Participant

- Solved challenges in cryptography, reverse engineering, and security exploitation
- Worked on encryption techniques, binary analysis, and logic-based vulnerabilities

Algomania 3.0 – Competitive Programming — 27th Place

- Top 40 out of 118 teams in prelims
- Demonstrated strong algorithmic problem-solving under time constraints

TECHNICAL SKILLS

Languages: Python, Java, C, C++, HTML, JavaScript

Frameworks: TensorFlow, React, Node.js

Libraries: Pandas, NumPy, Matplotlib, SciPy

Developer Tools: Git, MongoDB, Gemini API

INTERESTS

Artificial Intelligence / Machine Learning, Quantum Computing, Cryptography / Cybersecurity
